Packaging dimensions and weight

	PRISMA
Lenght (mm)	230
Depth (mm)	320
Height (mm)	1560
Net weight (kg)	13,5
Gross weight (kg)	15

Fundamental aspects for a correct operation

Minimum water pressure 2.5 bars, recommended 3 bars, always at the entrance of the column and a maximum of 5 bar.

Minimum water flow of 15 to 17 liters/min.

Normalised pipe diameter and hot water production.

Pressure difference between hot and cold water not exceeding 1 bar.

Thermostat temperature control according to the instructions
In the product.

Attention to possible pinching of the hoses before and after assembly.

Be sure to purge your facility of any impurities.

Periodically clean the thermostatic mixer filters.

READ THE INSTALLATION MANUAL CAREFULLY.
